## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17-18 are rejected under 35 USC §102(b)/103(a). This rejection is set forth in the prior Office action mailed on November 08, 2006.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 2-19 are rejected under 35 USC §103(a). This rejection is set forth in the prior Office action mailed on November 08, 2006.

### *Response to Arguments*

Applicant's arguments filed on April 09, 2007 have been fully considered but they are not persuasive. References are evaluated not for they explicitly teach, but for what they teach to one of ordinary skill in the art. It has been held that "[R]eferences are evaluated by what they suggest to one versed in the art, rather than by their specific

disclosures.” In re Bozek, 163 USPQ 545 (CCPA) 1969. In this case, it is well known that wood/logs have different type of fibers depending on the maturity of the wood, and even including the season, i.e., latewood, early-wood, springwood, summerwood, and that the fibers vary in size and coarseness depending upon such maturity, this has been explained in Rydholm, and therefore it is within the levels of ordinary skill in the art to classify such logs/wood depending of desired maturity, fiber length and coarseness.

Applicants argue that they are confused as to the meaning of wood in the Lundqvist reference, but one of ordinary skill in the art would really understand that wood has been used as log, since he teaches that the wood is used in pulp, which as it is well known deals with logs to make chips which are refined to make pulp. It is clear that wood comes from logs even they could be used for other purposes, i.e., lumber etc.

#### *Conclusion*

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
